## FDRM FDUR CLUSTER KCSE MODELG <br> PHYSICS PAPER 3 QUESTIONS

1. You are provided with the following:
-An ammeter ( 0 -2.5A)
-A voltmeter ( $0-5 \mathrm{v}$ )
-Two size D drY cells
-Mounted michrome wire (SWG 28) labeled X 1 metre long
-A switch

- Six connecting wires (four with crocodile clips)
-Cell holder

Proceed as follows:-
a) Connect the apparatus provided as shown below:-

Fig 1
b) With the crocodile clip at $\mathrm{C}=20 \mathrm{~cm}$ from A and the switch closed, record the voltmeter reading V in the table below:-
c) Repeat the procedure in (b) above the values of $L=30 \mathrm{~cm}, 45 \mathrm{~cm}, 60 \mathrm{~cm}, 70 \mathrm{~cm}$ and 90 cm (2mks)

| Length (L) cm | 20 | 30 | 45 | 60 | 70 | 90 |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| p.d (v) |  |  |  |  |  |  |

d) Plot a graph of P.d (V) against length L (cm) (5mks)

e) Determine the slope $S$ of the graph ( 2 mks )
f) Replace the voltmeter with an ammeter.
g) Read and record the ammeter reading I1, I2 and I3 for corresponding values of length L1 = $30 \mathrm{~cm}, \mathrm{~L} 2=50 \mathrm{~cm}$ and $\mathrm{L} 3=70 \mathrm{cmrespectively}$.

| I. When | $\mathrm{L}_{1}=30 \mathrm{~cm}$ | $\mathrm{I}_{1}$ | A |
| ---: | :--- | :--- | :--- |
| II. | $\mathrm{L}_{2}=50 \mathrm{~cm}$ | $\mathrm{I}_{2}$ | 1 mk |
| III. | $\mathrm{L}_{3}=70 \mathrm{~cm}$ | $\mathrm{I}_{3}$ | A |
| A | 1 mk |  |  |
|  |  |  |  |

h) Given that $V=S L$ where $V$ is the p.d across the length $A C$ wire $X, S$ is the slope of the graph in (d) above and $L$ is the length of the wire $X$ Using $V=S L$ determine the p.d V1, V2 and V3 across the lengths $A C$, $L$ of the wire for lengths L1, L2 and L3 in (g) above.
i. When $\mathrm{L}_{1}=30 \mathrm{~cm}$

$$
\begin{equation*}
\mathrm{V}_{1}= \tag{1mk}
\end{equation*}
$$

ii. When $\mathrm{L}_{2}=50 \mathrm{~cm}$

$$
\begin{equation*}
\mathrm{V}_{2} \quad= \tag{1mk}
\end{equation*}
$$

iii. When $\mathrm{L}_{3}=70 \mathrm{~cm}$

$$
\begin{equation*}
\mathrm{V}_{3} \quad= \tag{1mk}
\end{equation*}
$$

i) Using the values of $\mathrm{V} 1, \mathrm{~V} 2$ and V 3 and the corresponding $\mathrm{I} 1, \mathrm{I} 2, \mathrm{I} 3$, calculate the corresponding resistances R1, R2 and R3 of thebulb.
a) $\mathrm{R}_{1}$
(1mk)
b) $\quad R_{2}$
(1mk)
c) $\quad R_{3}$
j) Complete the average of the resistances of the bulb from (I) above (2mks)
2. PART 1:

You are provided with the following

- A pendulum bob
-A stop watch
-1.5 m long cotton thread
-Two small pieces of wood
- A retort stand and clamp

Proceed as follows:-
a) Suspended the pendulum bob from a retort stand such that $L=1.2 \mathrm{~m}$ the set up below:-

b) Displace the bob trough a small angle $\theta$ less than 100 and release it to oscillate in a vertical plane.
c) Determine the time for 20 oscillations
d) Record the values in table 2 below
e) Repeat the experiment for different lengths and complete the tablebelow:

## Table 2

| Length L (m) | Time t for 20 <br> oscillation (s) | Periodic time T (s) | $\mathrm{T}^{2}\left(\mathrm{~S}^{2}\right)$ |
| :--- | :--- | :--- | :--- |
| 1.2 |  |  |  |
| 1.0 |  |  |  |
| 0.8 |  |  |  |
| 0.6 |  |  |  |
| 0.4 |  |  |  |

f) Plot a graph of T2 (y-axis) against L (m) (5mks)

g) Determine gradient $S$ of the graph. (3mks)
h) Given that $T 2=4 \pi 2 l / g$ is the equation of the graph. Use the graph to determine the value of acceleration due to gravity, g. (3mks)

## PART II

You are provided with the following

- Concave mirror
- Mirror holder
- Metre ruler
- Candle

## - Screen

Proceed as follows:-
a) Determine the focal length of the mirror by focusing of a distant object on the screen and measure the length between the mirror and screen.

Repeat these three times.
$f(1)=$
$f(2)=$
$f(3)=(1 \mathrm{mk})$
Calculate the average focal length.
$f(a v)=(1 m k)$
b) Place candle light at a distance $U=40 \mathrm{~cm}$ from the concave mirror. Image $I$ is formed by reflection in the mirror obtained by moving the screen to and from to obtain a sharp image. Measure distance $V$ of the image from the mirror.

Fig 3
c) Adjust object distance $\mathrm{U}=50$ and repeat the procedure to obtain the corresponding value V . Record your values in the table 3below.

| $\mathrm{U}(\mathrm{cm})$ | $\mathrm{V}(\mathrm{cm})$ | $\mathrm{M}=\mathrm{v} / \mathrm{u}$ |
| :--- | :--- | :--- |
| 40 |  |  |
| 50 |  |  |

(2mks)
Given that the focal length of the mirror satisfies the equation.

$$
\mathrm{f} \quad=\underline{\mathrm{V}}
$$

$$
1+\mathrm{M} \quad \text { determine the average. }
$$

Value of focal length $f(2 m k s)$
